Document Management and Archieving

SAM involves Managing and Optimizing business daily tasks such as purchasing, deployment, maintenance, utilization and disposal of a software application within the organization.

SAM helps your business to:

TARGET will help you to establish a set of proven IT practices that unite people, processes, and technology to control and optimize the use of software across your organization.

We avoid offering "The one and only" solution, instead, depending on your business requirements we either provide a comprehensive solution or a specialized application targeting a certain need; or extending the possibilities of the solutions already used in your environment.
